PROSPECT CAPITAL CONVERTIBLE PREFERRED STOCK

We are proud of our long history of providing important capital to U.S. middle market businesses while delivering to our SHAREHOLDERS CONSISTENT RETURNS.

John Barry - Chairman of the Board,
CEO and Co-Founder

Past performance is neither indicative nor a guarantee of future results.

- 1 As of 6/30/2023. Loan-to-asset value leverage calculated as (Principal Debt Outstanding + Total Preferred Outstanding) / Total Assets. Dividend coverage ratio is net investment income for the quarter ended 6/30/2023 divided by one quarter of preferred dividends, based on the amount of preferred stock outstanding as of 6/30/2023. Includes coverage of \$149M of Series A shares with 5.35% dividend rate and \$870M of Series A1, A2, and M1 shares with 5.50% dividend rate.
- 2 Ratings current as of 8/28/2023. A credit rating is not a recommendation to buy, sell, or hold securities and is subject to revision or withdrawal at any time and without notice by the assigning agency. Each rating should be evaluated independently of any other rating, and investors should conduct thorough due diligence before investing. Moody's investment-grade credit ratings range from Aaa to Baa, and its high-yield credit ratings range from Baa to C. For S&P, Egan-Jones, Kroll, and DBRS, investment-grade credit ratings range from AAA to BBB, while high-yield credit ratings range from BB to C. High-yield is another name for non-investment-grade or junk bonds.
- 3 As of 6/30/2023. Based on balance sheet amounts
- 4 Any return of principal and dividends is subject to the credit risk of the issuer and terms of the offering documents
- 5 Dividends are intended to be paid monthly as authorized by the Board of Directors. The stated dividend rate on issuances of the Series A1, M1 and M2 Preferred Stock is 5.5%.
- 6 We will have a discretionary right to limit the aggregate liquidation preference of Preferred Stock subject to redemption following the death of a holder that may be exercised in any calendar year to an amount equal to the greater of \$10 million or 5% of all Preferred Stock outstanding as of the end of the most recent calendar year. Accordingly, no assurance can be given that exercise of a redemption following the death of a holder for the desired amount will be permitted in any single calendar year. Death redemption terminates upon listing of Preferred Stock.

Important Risk Factors to Consider

An investment in PSEC Preferred Stock involves certain risks, including the risk of a substantial loss of investment. You should carefully consider the information set forth in the "Risk Factors" section of the prospectus supplement and the prospectus for a discussion of material risk factors relevant to an investment in PSEC Preferred Stock, including but not limited to the following:

- The Preferred Stock will be subject to a risk of early redemption or conversion at our option and holders may not be able to reinvest their funds.
- Holders of the Preferred Stock will bear dividend risk. We may be unable to pay dividends on the Preferred Stock under some circumstances. In addition, the terms of any future indebtedness we may incur could preclude the payment of dividends in respect of equity securities, including the Preferred Stock, under certain conditions.
- There is limited liquidity and no public trading market for the PSEC Preferred Stock and there is no guarantee that the Preferred Stock will be listed on a national securities exchange.
- The Preferred Stock pays dividends at a fixed rate. The market values of fixed income investments tend to vary inversely with changes in market yields. The market yields on securities comparable to the Preferred Stock may increase, which would likely result in a decline in the market value of the Preferred Stock if it were to be traded on a national securities exchange. Additionally, if interest rates rise, securities comparable to the Preferred Stock may pay higher dividend rates and holders of the Preferred Stock, if it were listed on a national securities exchange, may not be able to sell the Preferred Stock at the Stated Value on a national securities exchange and reinvest the proceeds at market rates. The Company may be subject to a greater risk of rising interest rates due to the current period of rising interest rates and high inflation. The Federal Reserve has aggressively begun to raise interest rates, which is likely to drive down the prices of income or dividend-paying securities. The risk that interest rates may continue to rise is pronounced.
- We will have a discretionary right to limit the aggregate Liquidation Preference of Preferred Stock subject to redemption following the death of a holder that may be exercised in any calendar year to an amount equal to the greater of \$10 million or 5% of all Preferred Stock outstanding as of the end of the most recent calendar year. Accordingly, no assurance can be given that exercise of a redemption following the death of a holder for the desired amount will be permitted in any single calendar year.
- Preferred Stock is currently rated BBB- by Egan-Jones Ratings Company and BB by S&P. The credit ratings that have been issued on the Preferred Stock could be reduced or withdrawn while an investor holds Preferred Stock. A reduction or withdrawal of the credit rating would likely have an adverse effect on the market value of the Preferred Stock following a listing. In addition, a credit rating does not eliminate or mitigate the risks of investing in the Preferred Stock.
- Senior securities, including debt and preferred stock, expose us to additional risks, including the typical risks associated with leverage and could adversely affect our business, financial condition and results of operations.
- There is no cap on the number of shares of common stock that can be issued upon the conversion of shares of Preferred Stock. The conversion of the Preferred Stock into shares of common stock could cause the price of common stock to decline significantly.
- Our obligations to pay dividends or make distributions and, upon liquidation of us, liquidation payments in respect of the Preferred Stock is subordinate to our obligations to make any principal and interest payments due and owing with respect to our outstanding debt.
- In the event we do not generate a total return from dividends and interest received and net realized capital gains in an amount at least equal to our distributions for a given year, we may return capital as part of its distribution. This would decrease the asset coverage per shares with respect to the Preferred Stock, which could adversely affect their liquidity or market prices.
- The price of our common stock may fluctuate significantly during calculation and settlement of a holder conversion, and this may make it difficult for you to resell the Preferred Stock or common stock issuable upon conversion of the Preferred Stock when you want or at prices you find attractive.

Summary of fees and expenses: We will be subject to the following fees and expenses as part of the offering: selling commissions, dealer manager fees, and other offering expenses. Investors should consider the investment objectives, risks, charges and expenses of the investment company carefully before investing. The prospectus supplement and the accompanying prospectus contain this and other relevant information. Investors should read the prospectus supplement and accompanying prospectus carefully before investing. Investors may obtain the prospectus supplement and accompanying prospectus from your sales representative or Preferred Capital Securities at (855) 330-6594.
